

BUGEND™ PRE-BAITED STORED PRODUCT TRAP

USED TO ATTRACT AND KILL MOTHS AND BEETLES THAT INFEST BULK FOODS, FLOWERS, GRAINS, CHOCOLATE, NUTS, TEA AND TOBACCO.

Inexpensive, effective way to capture adult insect pests and, in so doing, stop their ability to reproduce and do more damage.

No separate lure is required. Simply peel the butcher paper off of the adhesive and deploy.

Trap is perforated to create 3 equal segments for easy folding and/or separation into 3 smaller traps.

Can be used flat or on edge, suspended, folded in a "U" shape, or formed into a delta shaped trap by tying the two end holes together using a wire hanger, twist tie, string, or paperclip (see examples in photo above).

ALPHA SCENTS, INC.

Alpha Scents makes and globally distributes quality insect monitoring systems comprised of various types of traps and lures designed to reduce toxic pesticide use.

Our catalog contains products targeted at most native and exotic insect species in agriculture, horticulture, ornamentals, forestry, and home and garden.

Custom pheromone synthesis for research, manufacturing, and governments is our specialty.

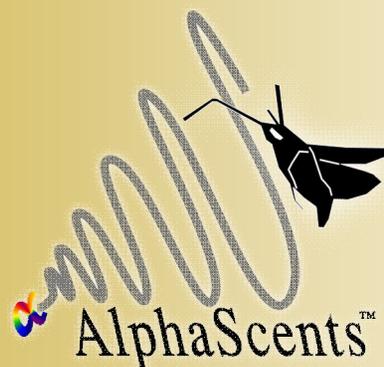

Lures are manufactured with high purity pheromones according to recommendations from the research community and are formulated to meet, or exceed, industry standards.

Alpha Scents strives to offer product and research prices that are attractive and competitive.

NATURAL CATCH® FRUIT FLY TRAP

A NATURAL & SAFE SELF-CONTAINED, READY TO DEPLOY TRAPPING SOLUTION

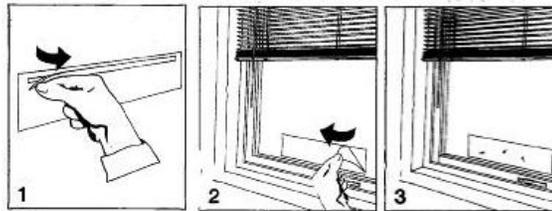

Control fruit flies and gnats with this convenient container that can be safely placed anywhere, including next to food.

Locations may include kitchens, dining areas, counters, fruit bowls, food preparation areas, and produce display cases and displays.

Simply use the precisely sized stick provided to pierce the openings on the top of the trap. Then, place trap where needed.

NON-TOXIC AND PESTICIDE-FREE

TRANSPARENT WindowBugCatcher™

CATCH FLYING BUGS INSIDE ANY BUILDING

Apply trap at the bottom of any window.

Insect pests are naturally attracted to the light and heat, typically approaching at window top and zigzagging their way to the bottom where the *invisible* WindowBugCatcher™ patiently waits to catch them.

Installation and disposal is safe, clean, and easy. No residue is left behind on the glass.

Available in two sizes:

- SMALL 9¼ x 2 in. (24 x 7 cm)
- LARGE 16 x 4¾ in. (41 x 12 cm)

Alpha Scents products are made and assembled in the United States of America.

FREQUENTLY ASKED QUESTIONS

Q What kind of stored products does the BugEnd™ trap help protect?

A Flour, meal, seeds, whole grains, raisins, crackers, biscuits, nuts, dried fruit, tea, powdered milk, pet food, chocolate, red peppers, cocoa beans, tobacco, dried flowers and sachets, peas, spices, cereal, wool fabrics, carpets, furs preserved specimens

Q Which insect species are attracted to the BugEnd™ trap?

A Indian Meal Moth, Mediterranean Flour Moth, Raisin Moth, Tobacco Moth, Almond Moth, Cigarette Beetle, Warehouse Beetle.

Q Where, and how, should the BugEnd™ trap be deployed? How long do the traps keep working?

A Place trap so it will be in line with a draft. Avoid closed spaces. Trap is typically used indoors within 12 ft (4 m) of stored (warehoused) product, food preparation areas, bulk food displays, museums, in homes, stores, etc. Replace BugEnd™ every 60 days, Natural Catch® 30 days, & WindowBugCatcher™ when it becomes saturated with insects

Q Can the traps be used outdoors?

A BugEnd™ and Natural Catch® are designed for indoor use. The effective life of these traps will be reduced when used outdoors. WindowBugCatcher™ can be used on windows in semi-open areas like stables.

INSTRUCTIONS: This page contains folding instructions. Do not print this page 3. Print pages 1 and 2 on both sides of 32 lb./120 g/m² premium matte paper.

Fold along these invisible lines to create a tri-fold brochure. The 2nd page of this document is the inside.
